

### How to use the USCT Motorsports K-frame Gauge

1. Only for telling difference between B/E Body cars B-Body 66-70, E- Body 70-74
2. Print this page landscape
3. Measure Gauge width and confirm it is 2" wide, adjust size and reprint until 2" wide
4. Cut out the gauge, fold at the circles and cut them out
5. Place the circle cuouts over the steering gear bolt holes on the K-frame
6. If the bracket lines up with the "E" notch, you have an E-Body K-frame
7. If the bracket lines up with the "B" notch, you have a B-Body K-frame
